

**The FAA Safety Team presents:**

# **When Worlds Collide!**

Do you believe in the Big Sky Theory? The belief that the sky is so vast that a collision with another aircraft could never happen? Don't believe it! Deadly mid-air collisions occur every year! Spotting other traffic is not an easy task, but, attend this informative briefing where featured speaker Dr. Ian Fries will share his secret for spotting potentially conflicting aircraft. Dr. Fries will discuss some effective methods to improve your ability to identify traffic and avoid it. At this exclusive meeting, Dr. Fries will provide you with the 'Fries Traffic Avoidance System' (FTAS) to deploy on your next flight. He will also share his concerns about pilot use of alcohol, drugs, and antidepressants. Don't miss it! Register Today!

**Directions:** From I-66, Take Exit 44 - Route 234 South (approach signs to the exit may mention Prince William Parkway). After approximately 8.5 miles, turn right at the Clover Hill Road light. Clover Hill Road will turn into Harry Parrish Blvd. The intersection of Harry Parrish Blvd and Wakeman Dr. will put you at Manassas Regional Airport.

**A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area  
Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
